Location: Xinzhuang District, New Taipei City, Taiwan

Professional Summary

Senior Equipment Engineer with 18 years of experience in the semiconductor industry at WIN Semiconductors. Specialized in equipment maintenance, troubleshooting, preventive maintenance (PM), and equipment improvement projects.

Strong background in electrical, mechanical, and piping systems with proven troubleshooting capabilities and cross-system integration experience. Experienced in equipment optimization and program modification, with the ability to analyze issues based on system logic and improve tool performance.

Eager to contribute technical expertise and hands-on experience to Veeco in the field of wet etch equipment.

Core Competencies

- Strong ability to work independently
- Equipment maintenance and troubleshooting
- Preventive maintenance (PM)
- Equipment program modification and tuning
- Equipment improvement project planning and execution
- SOP development and process optimization
- Electrical / Mechanical / Piping diagram interpretation

- Log analysis and data-driven diagnostics
-

Professional Experience

Senior Equipment Engineer

WIN Semiconductors

2008 – Present

Equipment:

Veeco PSP-M3204 / M3305 / M3307

Responsibilities:

- Perform equipment maintenance, troubleshooting, and emergency repairs
- Execute preventive maintenance (PM) to ensure stable operation
- Analyze equipment issues using logs and operational data
- Develop and optimize SOPs for maintenance and operation
- Modify equipment programs and adjust parameters
- Plan and execute equipment improvement projects

Key Achievements:

- Reduced equipment failure rate and improved tool uptime
 - Increased maintenance efficiency through standardized procedures
 - Trained junior engineers and facilitated knowledge transfer
-

Education

Lee-Ming Institute of Technology

Major in Mechanical Engineering

Graduated in 2005

Additional Information

- English: Basic proficiency
- Willing to work shifts and travel

- Driver's license (car)
